level can be present at any time. A major application of current loops is the industry de facto standard 4-20 mA current loop for process control applications, where they are extensively used to carry signals from process instrumentation ...

## **Current loop - Wikipedia**

# Bookmark File PDF 4 20ma Current Loop Primer Industrial Automation Training

Current is the rate at which charge is flowing. Resistance is a material's tendency to resist the flow of charge (current). So, when we talk about these values, we're really describing the movement of charge, and thus, the behavior of electrons. A circuit is a closed loop that allows charge to move from one place to another.
