The user would draw symbols in the sand to tally, for example, an account or take an inventory. The ancient Romans modified counting boards to create the world's first abacus. The Chinese abacus, which came into use centuries later, may have been an adaptation of the Roman abacus. Similar devices were

This is why many math
curricula use spiraling:
they come back to a
concept the next year,
the next year, and the
next. This can be very
good if not done
excessively (for 5-6
years is probably
excessive). However,
spiraling has pitfalls

Access Free Abacus Mind Math Instruction Book

also: if your child doesn't get a concept, don't blindly "trust" the spiraling and think, "Well, she gets it the next year when the book comes back around to it."

Teaching math - four principles of deeply effective math ...

It's tough to get better at math if you skip classes. You'll miss out on valuable instruction if you're absent, and
