from The Analogous City, the Map, by Dario Rodighiero, EPFL (CH) The Anthropocene - the newest geological epoch - can also be seen as an epoch of cultural change. That is: a change in the story we tell ourselves, in the narrative by which we explain our relationships with others and the rest of nature.

In order to output multiple response maps with magnitude in different ranges for a particular visual pattern, existing networks employing ReLU and its variants have to learn a large number of redundant filters. In this paper, we propose a multi-bias non-linear activation (MBA) layer to explore the information hidden in the magnitudes of responses.
