Chapter 19 Section 1 Protists Answer Key Quebacanore

They are eukaryotes – organisms that have cells with a nucleus and membrane-bound organelles. They typically live in aquatic or moist environments. Most protists are unicellular (made of only one cell) but they may live in colonies. But there are some protists are are multicellular (containing more than one cell)

Protists - BIOLOGY JUNCTION

Protists are difficult to classify. You have learned that the three-domain system of classification divides prokaryotes into two domains, Archaea and Bacteria, and places all eukary- otes in one domain, Eukarya. There are four kingdoms within the domain Eukarya: Animalia, Fungi, Plantae, and Protista. The kingdom Protista includes many phyla.
