Bones Of The Skull Labeling

The bones that make up the cranium are called the cranial bones. The remainder of the bones in the skull are the facial bones. Figure 6.7 and Figure 6.8 show all the bones of the skull, as they appear from the outside. In Figure 6.9, some of the bones of the hard palate forming the roof of the mouth are visible because the mandible is not present.

Labeling Bones of the Skull Flashcards | Quizlet

The cranium (skull) is the skeletal structure of the head that supports the face and protects the brain. It is subdivided into the facial bones and the brain case, or cranial vault (Figure 1). The facial bones underlie the facial structures, form the nasal cavity, enclose the eyeballs, and support the teeth of the upper and lower jaws.
