Howard M. Fillit MD, in Brocklehurst's Textbook of Geriatric Medicine and Gerontology, 2017 Paternalism. Paternalism is the term used for actions taken or decisions made for another person with the intention of benefiting that person. The word is derived from the Latin word for father; the idea is that a paternalist decision is like the decision a good father would make for his child.

Falls are a marker of frailty, immobility, and acute and chronic health impairment in older persons. Falls in turn diminish function by causing injury, activity limitations, fear of falling, and loss of mobility. Most injuries in the elderly are the result of falls; fractures of the hip, forearm, humerus, and pelvis usually result from the combined effect of falls and osteoporosis.
