### Communicable Disease Control Carter Center

Establishment. The Communicable Disease Center was founded July 1, 1946, as the successor to the World War II Malaria Control in War Areas program of the Office of National Defense Malaria Control Activities.. Preceding its founding, organizations with global influence in malaria control were the Malaria Commission of the League of Nations and the Rockefeller Foundation.

### Centers for Disease Control and Prevention - Wikipedia

An infection is the invasion of an organism's body tissues by disease-causing agents, their multiplication, and the reaction of host tissues to the infectious agents and the toxins they produce. An infectious disease, also known as a transmissible disease or communicable disease, is an illness resulting from an infection.. Infections can be caused by a wide range of pathogens, most prominently ...

### Infection - Wikipedia

Thus, immunization protects susceptible individuals from communicable disease by administration of a living modified agent, a subunit of the agent, a suspension of killed organisms, or an inactivated toxin to stimulate development of antibodies to that agent. In disease control, individual immunity may also protect another individual.
