substance is higher when the
substance's temperature is higher.

11.2 Heat, Specific Heat, and Heat Transfer - OpenStax

Entropy is a scientific concept as well as a measurable physical property that is most commonly associated with a state of disorder, randomness, or uncertainty.

Download Ebook Concept Review Section Energy Transfer Answer Page

The term and the concept are used in diverse fields, from classical thermodynamics, where it was first recognized, to the microscopic description of nature in statistical physics, and to the principles of information theory.

Entropy - Wikipedia

Download Ebook Concept Review Section Energy Transfer Answer Page

The change in internal energy is $\Delta U = Q - W = 9.00 \text{ J}$. (b) Heat transfer removes 150.00 J from the system while work puts 159.00 J into it, producing an increase of 9.00 J in internal energy. If the system starts out in the same state in (a) and (b), it will end up in the same final state in either case—its final state is related to ...
