July 6 - July 24, 2020. The Experimental Physics Academy focuses on modern physics, specifically mechanics, electromagnetism, quantum dynamics, and astrophysics. Through lectures, activities, projects, and discussions with their instructors, students move past memorized equations to gain an understanding of cause and effect, and ultimately an appreciation of physics on a higher level.

Overview. Experimental physics regroups all the disciplines of physics that are concerned with data acquisition, data-acquisition methods, and the detailed conceptualization (beyond simple thought experiments) and realization of laboratory experiments. It is often put in contrast with theoretical physics, which is more concerned with predicting and explaining the physical behaviour of nature than the acquisition of knowledge about it.
