By Staff Writer Last Updated Apr 14, 2020 10:59:27 PM ET. Echo/Cultura/Getty Images. Most ninth grade biology course curriculum's cover evolution, cells and cell division, heredity and genetics, cellular respiration, ecology, photosynthesis, and human biology, but every high school curriculum is different. Most courses also allow students to dissect an animal such as a pig or frog during lessons about human anatomy.

What Do You Learn in Ninth Grade Biology?

These test blueprints are designed to communicate the structure of the Georgia Milestones measures. The blueprints outline the types of items students will encounter on each grade and content area/course test, as well as the number of items and number of points possible (for those tests which include constructed-response items).

Georgia Milestones Test Blueprints

Science. There is a wide range of topics that 9th-grade students can study for science. Standard high school courses include biology, physical

science, life science, earth science, and physics. Students may also take interest-led courses such as astronomy, botany, geology, marine biology, zoology, or equine science.

Typical Course of Study for 9th-Grade - ThoughtCo

The law mandated that the board drop the economics test. The board decided to drop tests in geometry, physical science and 9th grade literature and composition. All eight courses are still required for graduation. The federal government requires high school students take at least one test in math, science and English/language arts.
