In other words: the FOH engineer controls the audience's sound experience, while the monitor engineer supports the musicians directly in hearing one another, staying together, and giving their best performance. Both roles are essential for great live sound, but in clubs and smaller venues, they may be performed by a single engineer.

### **Live Sound Mix Engineer | Berklee College of Music**

An audio engineer (also known as a sound engineer or recording engineer) helps to produce a recording or a live performance, balancing and adjusting sound sources using equalization and

## **Handbook for Sound Engineers (Audio Engineering Society ...**

Equalization is the process of adjusting the balance between frequency components within an electronic signal. The most well known use of equalization is in sound recording and reproduction but there are many other applications in electronics and telecommunications. The circuit or equipment used to achieve equalization is called an equalizer.
