[PDF] Java The Complete Reference Eleventh Edition ...

The class is at the core of Java. It is the logical construct upon which the entire Java language is built because it defines the shape and nature of an object. As such, the class forms the basis for object-oriented programming in Java. Any concept you wish to implement in a Java program must be encapsulated within a class.

Java - Kar

The Java Spec says that everything in Java is pass-by-value. There is no such thing as "pass-by-reference" in Java. The key to understanding this is that something like. Dog myDog; is not a Dog; it's actually a pointer to a Dog. The use of the term "reference" in Java is very misleading and is what causes most of the confusion here.
