The estd. 2nd-order nonlinear susceptibility of 900 pm/V is remarkably high among those reported in 2-dimensional materials. The laser polarization dependence of ReS₂'s SHG is strongly anisotropic and indicates its distorted lattice structure with more unequal and nonzero 2nd-order susceptibility elements.

Hexagonal boron nitride (hBN) hosts long-lived phonon polaritons, yielding a strong mid-infrared (mid-IR) electric field enhancement and concentration on the nanometer scale. It is thus a promising material for highly sensitive mid-IR sensing and spectroscopy. In addition, hBN possesses high chemical and thermal stability as well as mechanical durability, making it suitable for operation in ...

This is a list of semiconductor fabrication plants. A semiconductor fabrication plant is where integrated circuits (ICs), also known as microchips, are manufactured. They are either operated by Integrated Device Manufacturers (IDMs) who design and manufacture ICs in-house and may also manufacture designs from design-only (fabless firms), or by Pure Play foundries, that manufacture designs from ...
