### The Importance of Ignition Advance - High Performance Pontiac

I was looking at a new trick distributor at the weekend and the question of top end advance came up. My engine is a 4.2 XK Jaguar lump with standard 9:1 pistons, mild duration but very high lift cams with triple Weber carbs. I run about 36-39deg of advance at around 3-3.5K revs with about 12 at tick over.

Total advance is initial advance plus mechanical advance. There are two ways to change the total, adjust the initial advance by turning the distributor or adjust the mechanical advance mechanism. The easiest, and cheapest way is to just turn the distributor until you get the total you want then just leave the initial wherever it ends up.
