How to Predict and Balance Chemical Reactions - YouTube

Download Ebook Predicting

This worksheet is designed to help you predict products of simple reactions of the four basic reaction types (synthesis, decomposition, single replacement, and double replacement) and combustion reactions. For the first few reactions, the type of reaction is listed, you should predict the products, then balance.

Although several publications have focused on predicting which the most likely product is given a set of reactants, less emphasis has been placed on predicting reaction conditions for well-known and established reactions. An exception is the study of Michael-type reactions by Varnek and co-workers.
