\$beginingroup\$ @raptortech97 Aerobatic pilots are at much higher risk than pilots in normal flight. I think Lnafziger's analogy of wearing helmets in cars is actually very apt. Going along with that analogy, racecar drivers do wear helmets (and have lots of other extra safety systems) for precisely the reason that aerobatic pilots wear chutes: they're much more likely to be involved in a bad ...

Pilots were given a manual that detailed how they were supposed to think, prepare and attack. From this manual, pilots were told to "attain a high level of spiritual training", and to "keep [their] health in the very best condition". These instructions, among others, were meant to make pilots mentally ready to die.

The manual states that for fatigue mitigation, "in-flight rest does not count as flight time", straying from a standard calculation used by most civil aviation authorities. "They count the hours in a different way. Not so long ago I was the 'third pilot' on duty - my duty was monitoring the pilots in the front, so I was 100% active," Erik said.
