The rise in digital media consumption, especially among children, raises the societal question of its impact on cognition, mental health and academic achievement. Here, we investigate three different ways of measuring technology use—total hours of media consumed, hours of video game play and number of media used concurrently—in 118 eight-to-twelve year-old children.

Einstein's general relativity says that space and time are knitted together into a spacetime fabric that pervades the universe. Gravity manifests because massive objects, like stars, warp this fabric, and smaller objects—including particles of light, known as photons—follow the resulting contours in the fabric.
